

LESSON
5•1**Birthday Box**

Use only numbers from one data bank below to fill in the missing values for this number story.

Reminder: oz means ounce

For her birthday, Alisha got a box containing _____ pieces of candy that weighed _____ oz. Each piece of candy weighed _____ oz. She ate _____ pieces of candy. The remaining _____ pieces of candy and the box weighed _____ oz. The weight of the box is _____ oz.

1. Read the problem.
2. Think about how the missing values need to relate to each other. Which values should be greater than other values? Which should be less than other values? Are there multiples that can help you?
3. Fill in the missing values.
4. Read the problem again. Make sure the number relationships make sense.

Data Bank: Whole Numbers

1	2	6	30	36	61	73
---	---	---	----	----	----	----

Data Bank: Fractions and Mixed Numbers

$\frac{1}{3}$	$\frac{3}{4}$	$5\frac{3}{4}$	$8\frac{3}{4}$	9	15	24
---------------	---------------	----------------	----------------	---	----	----
